Attention: Natalie, Webaiden

Dear Natalie:

SUBJECT: NEW WEBSITE DESIGN

I want to thank you for the impressive job that you did in designing our new website. The website not only looks great but is functional and easy to update, which is very important to me. Since you have re-designed our site, we have noticed a significant increase in both traffic and sales leads and it rates very high on search engines.

The feedback that I have received from prospects has all been positive. People have told me that our site is attractive, informative and user friendly as well as professionally done, which as a home builder is extremely important. It has been a pleasure to work with a web designer who can truly blend creativity and functionality together.

I would recommend Webaiden to anyone looking to have a website created or re-designed and would be very confident that they would be extremely satisfied with the end product. Please accept my thanks and I wish you continued success.
